

All SOLON module series are now MCS certified

Berlin, Germany, 16th February 2011. All currently available series of SOLON modules are now accredited under the UK Microgeneration Certification Scheme (MCS). MCS accreditation is an important step in expanding SOLON's presence in the UK market.

The MCS certificate verifies that SOLON solar modules and systems in the UK are eligible for feed-in tariffs. The Clean Energy Cashback Scheme, for example, requires that both the components as well as the installer of a photovoltaic system are MCS certified.

This requirement is intended to ensure that the installed solar power technology meets the highest quality standards. In addition to solar module testing, the certification procedure also includes an evaluation of the manufacturing processes, the materials and technology used in making the modules and the qualifications of employees. MCS accreditation underscores the premium quality of SOLON products.

+++ Meet us at ecobuild, March, 1-3 2011 in London, stand N2523 +++

About SOLON SE:

SOLON SE is one of the largest manufacturers of solar modules in Europe as well as a supplier of solar system technology for large-scale rooftop and greenfield installations. The SOLON Group has subsidiaries in Germany, Italy, France and the U.S. and employs more than 800 people worldwide. SOLON's core business is producing solar modules and photovoltaic systems along with planning and constructing large rooftop installations and turnkey solar power plants all over the world.
