

Solon supplies further 5 MW to the Romanian market

di Brenta, November 4th, 2014. Solon's strong activities on the Romanian market continue with large supplies both of pv modules and components, and with the realization of turn-key plants.

During the last few days Solon has entered into a new contract for the supply of 5 MW of polycrystalline photovoltaic modules SOLON Blue 220/16, with nominal power of 250 Wp and 255 Wp.

Emiliano Pizzini, President and C.E.O. of Solon S.p.A., expresses his satisfaction on the closing of this deal: "The Romanian market is one, among export markets, where we have been achieving very good results, thanks to the remarkable interest in the use of photovoltaic technology. This contract confirms once again the importance of the new strategy undertaken by our company in the international scenario". And he adds: "Taking this direction led us to the setting up of a large international team specifically in charge of the activities towards extra-Italian markets".
